Exploring The WELL v2 Materials Concept

IDCEC Course # Designation- HSW
AIA Course #WMC01 Designation- HSW
GBCI Course #0920034996

Course Credits:
0.5 CEU / 0.5 LU / 0.5 CE Hour

Course Description:
We spend nearly 90% of our lives indoors – making the spaces where we live, work, learn, and heal incredibly impactful to our lives. This engaging CEU explores how thoughtful material selection can transform the built environment from a passive backdrop into an active contributor to a person's wellbeing.

Centered on the WELL Building Standard, this course introduces a leading, science-based framework for creating people-first spaces. With a focused deep dive into the WELL v2 Materials Concept, participants will gain a clear understanding of how building materials impact indoor air quality, occupant comfort, and long-term wellbeing.

Course Objectives:
1. Understand the key principles of WELL v2 and the Materials concept.

2. Identify the health and environmental requirements for Materials strategies within WELL v2.

3. Recognize the impact of material selection on health and wellbeing.

4. Apply best practices for material selection.
